## TABLE OF CONTENTS

FOREWORD . . . . .	1
TABLES	
Daily Maximum, Minimum, and Mean Temperature . . . . .	2-13
Precipitation . . . . .	2-13
Solar Radiation . . . . .	2-13
Evaporation and Wind Movement . . . . .	2-13
Monthly and Annual Average Temperature and Precipitation, 1855-1952 . . . . .	14
Monthly and Annual Average Evaporation, 1947 - 1950 & 1964 - 1968 . . .	14
Six Hourly Temperature and Relative Humidity . . . . .	15-26
Soil Temperature, Wind Direction and Speed . . . . .	27-38
Duration in Hours and Tenths of Hours that the Temperature was 32F or Lower . . . . .	39-40
Cooling Degree Days - Base 75F . . . . .	41
Heating Degree Days - Base 65F . . . . .	42
Time of Sunrise . . . . .	43
Time of Sunset . . . . .	44
Growing Degree Days - Base 40F . . . . .	45
Growing Degree Days - Base 45F . . . . .	46
Growing Degree Days - Base 50F . . . . .	47
Precipitation Accumulation and Departure from Average . . . . .	48

## FOREWORD

Except for the long term averages of temperature, precipitation, and evaporation, data in this publication were recorded at the Weather Bureau micro-meteorology station located at the south end of the Agronomy Farm at Auburn University. The station was established during September, 1963, with the cooperation of the Auburn University Agricultural Experiment Station and the Agronomy and Soils Department. The current Cooperative Weather Observer is Mr. Jack Jones, foreman of the Agronomy Farm.

Soil temperatures and evaporation readings are for a 24-hour period ending at 8:00 AM for the day indicated. All other readings are for a 24-hour period from midnight to midnight for the indicated date.

The sensing elements for the soil thermometers are under bare soil while all other instruments are exposed over sod.

Evaporation is measured in the Weather Bureau Class "A" pan of 4 foot diameter.

Unless otherwise indicated, units in this publication are as follows:

Temperature in °F

Relative humidity as a percentage

Wind speed in miles per day

Solar radiation in langleys (gram calorie/sq. cm.)

Precipitation and evaporation in inches

Cooling degree days are used in computing air conditioning requirements. The "base" for such computations is the mean daily temperature of 75°F. These data are obtained by subtracting 75°F from the mean daily temperatures, if the latter is above 75°F. A day with a mean temperature of 76°F is one degree day. If the daily mean temperature continues above 75°F for any length of time, air conditioning or cooling will be required for human comfort.

Heating degree days are used in computing fuel requirements. The "base" for computing heating degree days is a mean daily temperature of 65°F. A mean daily temperature of 64°F is one degree day. If the daily mean temperature continues below 65°F for any length of time, heating will be necessary for human comfort.

Sunrise and sunset are considered to occur when the upper edge of the disk of the sun appears to be exactly on the horizon, with normal atmospheric conditions, and at zero elevation above the earth's surface in a level region. Times of sunrise and sunset shown in this publication are valid for the remainder of the 20th century.

Growing degree days were computed daily by averaging the maximum and minimum temperature and then subtracting the "base" temperatures of 40, 45, and 50°F.

Paul A. Mott  
Advisory Agricultural Meteorologist  
ESSA Weather Bureau  
Auburn University, Auburn, Alabama

Sunrise and sunset are considered to occur when the upper edge of the disk of the sun appears to be exactly on the horizon, with normal atmospheric conditions, and at zero elevation above the earth's surface in a level region. Times of sunrise and sunset shown in the tables are valid for the remainder of the 20th century.

Table 42. Time of Sunset at Auburn, Alabama (p.m., CST),

Sunrise and sunset are considered to occur when the upper edge of the disk of the sun appears to be exactly on the horizon, with normal atmospheric conditions, and at zero elevation above the earth's surface in a level region. Times of sunrise and sunset shown in the tables are valid for the remainder of the 20th century.
