ALABAMA AGRICULTURAL STATISTICS

1994 - 1995

BULLETIN 38

BULLETIN 38

EXPERTS IN THE FIELD

Perceptions are important and create a mind-set that guide consumer behavior. Based on this reasoning and the need to clearly identify Alabama products in a rapidly expanding world marketplace, an Alabama *logo program* was recently adopted by the Alabama Department of Agriculture and Industries. The intent is to let consumers know that the products they purchase or consume are quality Alabama products. Yes, Alabama producers are "Experts in the Field." Recognition needs to be given to the point of origin--Alabama--from where these quality products originate. Look for the Alabama logo and support Alabama Agriculture!

Special thanks to Alabama Farmers Federation (ALFA) for providing the front cover. Alabama Agricultural Statistics is one of the most colorful and attractive annual bulletins of all State Statistical Offices.

The National Association of State Departments of Agriculture (NASDA) is a nonprofit, nonpolitical organization comprised of the 50 State Departments of Agriculture. NASDA and USDA-NASS have a cooperative agreement for NASDA to employ enumerators in the collection of agricultural statistics. Following is a list of Alabama's NASDA enumerators (as of January 1, 1996). Without their help, the presentation of statistics in this bulletin would not be possible. The Alabama Agricultural Statistics Service gratefully acknowledges the work and integrity of its NASDA enumerators.

FIELD ENUMERATORS

(and home county)

Myriam Allen - Baldwin
Huston Bolton - Colbert
Samuel M. Carr - Crenshaw
Sarah Castile - Lauderdale
Jerry B. Clark - Greene
Billy C. Davis - Butler
James Estes - Dale
John E. Harper - Monroe

S.I. Harry - Elmore
Charlie Huddleston - Cullman
Irene Kaiser - Baldwin
Clarence D. Nelson - Covington
Ottis Polk - Wilcox
Doris Prince - Franklin
Beth Reid - Madison
William Slagle - Chambers
Charles V. Snipes - Marengo

Elmer O. Strickland - Tallapoosa
Ralph C. Thompson - Baldwin
W. Thompson - Tallapoosa
James Tucker - Fayette
Norma A. Waters - Houston
Peggy J. Waters - Houston
Lillie S. Williamson - Marshall
Louise Wilson - St. Clair
Barry E. Wood - Butler

Agriculture provides a foundation for economic growth in Alabama. To capitalize on the benefits of agricultural production, it is important that reliable information be available. Decisions which effect agriculture will ultimately be directed back to production: what, where and how much of a commodity is being produced? The Alabama Department of Agriculture and Industries and Alabama Agricultural Statistics Service are pleased to provide this bulletin which addresses these questions and summarizes 1995 Alabama agricultural production.

Our bulletin cover this year draws attention to the growing and thriving aquaculture industry in Alabama, particularly catfish farming. In the past 10 years, cash receipts have jumped from less than \$15 million to a little over \$50 million for 1995. Alabama ranked second in annual catfish sales behind Mississippi. Sales from crawfish and carp also contribute to this important segment of the state's income from aquaculture.

The Alabama Agricultural Statistics Service staff is dedicated to serving you. Contact us anytime with your comments, questions and requests for information.

Jack Thompson
Commissioner

With passage of the Federal Agricultural Improvement and Reform (FAIR) Act of 1996, agriculture is on the threshold of returning to a more market oriented sector of our Nation's economy. The deemphasis of government price supports for cotton, feed grains, wheat, and rice is a major farm policy change. For many Alabama farmers, this reform could not have come at a better time. No longer are producers constrained by what or how much of these program supported commodities they may plant. And, with expanded foreign markets for U.S. grains, oilseeds, cotton, poultry, and red meat, having a real production choice is long overdue.

However, the picture is not perfect. Cattle producers are experiencing some of the lowest returns in modern history, and prices for poultry feed are as high as ever. But, through good times and bad, producers rely heavily on reliable information to base their production and marketing decisions. Basic production and inventory statistics are a must for Alabama farmers and ranchers, no matter what the short and long term price outlook might be.

It is with great pride that the Alabama Agricultural Statistics Service and the Alabama Department of Agriculture and Industries present this 1995 edition of Alabama Agricultural Statistics. In addition to this printed bulletin, look for these statistics on the Internet at our home page address: <http://www.acenet.auburn.edu/department/nass/>

We applaud the many Alabama farmers, ranchers, agri-businesses, and other agricultural organizations, both private and government, who helped make this bulletin possible. Please contact our office in Montgomery if we can be of service to you in providing Alabama or U.S. Agricultural Statistics.

State Highlights for 1995-96:

- ✕ Total farm and forestry receipts were over \$4.1 billion for the year.
- ✕ Cash receipts from farm commodities totaled \$2.91 billion, against \$2.95 billion the previous year.
- ✕ The top five commodities for cash receipts were: (1) poultry, (2) cattle and calves, (3) cotton, (4) nursery, sod, and greenhouse products, and (5) peanuts. Together they made up about 85 percent of the total receipts. Sales from these enterprises were each over \$100 million.
- ✕ Livestock and poultry accounted for three-fourths of the cash receipts and crops the other fourth.
- ✕ Poultry made up almost 60 percent of the total cash receipts.
- ✕ Alabama ranked third in broiler production with marketings of 900.0 million birds.
- ✕ Laying flocks produced 2.69 billion eggs to rank 11th in egg production.
- ✕ Cattle inventory on January 1, 1996 was 1.75 million head. The state's ranking was 22nd.
- ✕ Catfish sales amounted to \$50.9 million. Alabama ranked second behind Mississippi in sales.
- ✕ Principal crops and acreages were: cotton (590,000), corn (250,000), soybeans (240,000), peanuts (213,000), and wheat (120,000).
- ✕ The state ranked third in peanuts and 11th in cotton production.

Alabama's Rank Among States: Crop Production and Livestock, 1995

Item	Unit	Rank	Production or Number		Percent of U.S. Amount

Weather Summary

The top weather story of the year was Hurricane Opal. This destructive hurricane moved over the Western Florida Panhandle on Wednesday October 4th and proceeded north northeast through central and northeast Alabama. Widespread property damage occurred as far north as the Tennessee border primarily due to downed trees and power lines. Hurricane force winds extended into extreme south Alabama with wind gusts exceeding 50 MPH in central and east Alabama. Heavy rains prior to the strongest winds saturated soils making it even easier for winds to uproot trees. Damage was not as severe over extreme west and northwest Alabama. Rain totals of 10 to 20 inches occurred in a two day period with the associated pre-hurricane cold front and rains from the hurricane itself. Hurricane Erin, though much less intense, inflicted heavy rains and minor damage to southwest Alabama on August 3rd.

Another major weather highlight was the hot and drought type conditions that existed much of the summer months particularly across central Alabama. May, July, and August temperatures were above normal with August averaging 4 to 7 degrees above normal across north and central Alabama. Several heat records were established in August with locations in central Alabama reaching or exceeding 100 degrees on 4 to 8 days of the month. Below normal rain totals were common much of the summer particularly over central Alabama with monthly rain totals of 2 inches or less.

Rainfall totals for the year were heaviest over southwest Alabama where amounts of 80 to 95 inches were common. These totals were 15 to 30 inches above normal. Elsewhere rain totals for the year averaged in the 45 to 60 inch range with the lighter totals most common over east central Alabama. However local rain totals of 60 to 75 inches were reported over parts of northwest and northeast Alabama. These totals varied from as much as 10 inches less than normal over parts of central and east Alabama to 5 to 15 inches above normal over parts of northwest and northeast Alabama. Rain was reported on 100 to 125 days of the year over most of the state. Portions of central Alabama reported rainfall on only 80 to 100 days.

Temperatures for the year averaged 1 or 2 degrees above normal. November and December were the coldest months in comparison to normal with temperatures averaging 2 to 5 degrees below normal. Highest temperatures were in the upper 90s extreme north and Coast and 100 to 104 degrees elsewhere. Maximum temperatures of 90 degrees or above occurred on 80 to 100 days of the year over most of central and south Alabama but on only 40 to 50 days of the year over northeast Alabama. Temperatures reached 100 degrees on 5 to as many as 13 days of the year over the central half of the state. Coldest temperatures for the year were mostly in the teens but varied from the single digits north to low 20s Coast. Days with freezing temperatures varied from 55 or more extreme north to about 20 days along the Gulf Coast.

Crops Review

BY

MARK E. HUDSON

Total Acreage of Principal Crops Down: Harvested acres of corn, cotton, hay, peanuts, and soybeans totaled 1,955,000 acres for the 1995 season. This compares with 1,962,000 acres the previous year and 1,934,000 in 1993. Corn, hay, peanuts, and soybean acreage declined by 130,000 in 1995. Area harvested for cotton rose by 123,000.

Crop Yields Mostly Lower: Alabama's peanut crop was the only major commodity with a higher yield than the previous year. The average yield was 2,280 pounds per acre compared with 2,010 pounds in 1994. The state's corn yield was 75 bushels per acre in contrast to the record yield of 96 bushels per acre set in 1994. The cotton average yield was 409 pounds per acre, significantly below the previous year's yield of 766 pounds. The soybean yield, at 24 bushels per acre, was below the record set in 1994 of 31 bushels. Yields for most other crops produced in Alabama also showed a decline.

Early Crop Season Progress: Wet weather delayed or limited fieldwork in many areas during January and February. Dry weather during March allowed fieldwork to progress ahead of normal. Dry conditions prevailed until Mid-April. Welcome showers helped seed germination and seedling emergence. Cool weather caused thin stands in north Alabama forcing replanting of many fields. Marginal cold events and heavy fruit set in peach orchards forced producers to thin fruit in many areas. Clear warm weather in late May provided excellent conditions for seeding row crops and harvesting small grains. Peaches ripened quickly under hot dry conditions during June. Plant growth was rapid, especially in areas with adequate soil moisture. Dry weather patterns continued through July in most localities.

Late Crop Season Progress: Rains from Hurricane Erin provided relief for crops, especially in south Alabama. Tobacco Bud Worm pressure was high in the Tennessee Valley. Hot, dry weather stressed row crops during August in many areas. Much needed rain fell during mid-September providing relief to pastures and hay fields. Row crop harvest was in full swing in October with clear weather providing excellent harvest conditions until Hurricane Opal arrived on October 4. The Wiregrass Area was hardest hit with heavy rains and high winds. Opal toppled pecan trees and blew cotton lint out of its bolls. Clear weather returned in mid-October, helping farmers catch up harvesting row crops. Wet ground delayed harvest in many areas during November, but almost all cotton and soybean fields were harvested by December 10.

Five Leading Crops: Progress For 1995

Crop	Planting Began	Planting Ended	Harvest Began	Harvest Ended
Corn	Mid March	Mid May	Late July	Early November
Cotton	Early April	Mid June	Mid September	Mid December
Peanuts	Late April	Mid June	Early September	Early November
Soybeans	Late April	Early July	Late September	Mid December
Hay, first cutting	-	-	Early May	Mid July

Acreage, Yield, Production, Price, and Value of Production, 1995

Crop	Unit	Planted for All Purposes	Harvested	Yield per Harvested Acre	Production	Season Average Price	Value of Production
		Thousand Acres		Units	Thou Units	Dollars	Thou Dollars
Corn grain	Bu.	250	220	75	16,500	3.25	53,625

Livestock Review

BY

RICK GEESEY

Cattle and Calves: Cash receipts from farm marketings climbed 3 percent from 1994 to reach \$308.3 million. A strong 27 percent increase in the number of cattle and calves marketed more than offset weak prices to push cash receipts up. Prices received by Alabama producers during 1995 for cattle and calves averaged \$51.40 and \$59.70 per hundredweight, respectively. Cattle prices were \$11.60 per cwt below 1994 and calf prices were down \$18.50 from the previous year. Pressured by large supplies of beef and falling prices, producers began reducing the size of their herds. On January 1, 1996, 1.75 million head of cattle and calves were on farms in Alabama, a decline of 2 percent from a year earlier. Beef cow inventory was down 1 percent to 898,000 head and beef cow replacement heifers, at 155,000 head, were down 4 percent from the previous year. The estimated 32,000 milk cows were down 11 percent from a year earlier.

Hogs and Pigs: All hogs and pigs on hand December 1, 1995 numbered 230,000 head, a decrease of 18 percent from 1994. The number of breeding hogs, at 30,000, was down 14 percent and total market hogs, at 200,000, were down 18 percent. Fifty-three thousand sows farrowed 411,000 pigs in 1995. The average number of pigs per litter was 7.8, compared with 7.7 in 1994. Cash receipts from hogs and pigs were \$67.5 million and the average price received per cwt was \$35.80.

Milk Production: The dairy industry in Alabama continued the trend toward fewer milk cow operations. The number of operations with milk cows during 1995 was estimated at 350. There were 253 commercial dairies as of January 1, 1996 according to the State Department of Agriculture and Industries. Milk produced in the State totaled 482 million pounds in 1995, 4 percent less than the previous year. However, as efficiencies continue to be gained, milk per cow increased 662 pounds to average 14,176 pounds. Prices received decreased 70 cents per cwt from \$14.70 in 1994 to \$14.00 per cwt in 1995. Alabama cash receipts from milk were off 8 percent in 1995 to 66.9 million.

Catfish: Sales of catfish in Alabama surged 24 percent to \$50.9 million during 1995 from \$41.1 million during 1994. The average price received for foodsize catfish was 72 cents per pound, compared with 74 cents the year before. Prices remained strong throughout 1995 as demand kept pace with available supplies. There were 250 operations in the State producing catfish on January 1, 1996. The catfish industry continued to show a moderate rate of expansion through 1995. Water surface area used for catfish production was up 9 percent from the preceding year to 19,600 acres.

Sheep and Lambs: After experiencing a sharp decline in sheep and lamb numbers during 1994, inventory levels appear to have stabilized. On January 1, 1996, there were 7,000 sheep and lambs on Alabama farms, unchanged from January 1995. Ewes, at 3,700 head, decreased by 20 percent while rams, at 500 head, compared with 300 head in 1995. Replacement lamb numbers were up strongly at 1,300 head, a 63 percent increase. The 1995 cash receipts for sheep and lambs totaled \$21,000 a drop of 90 percent from 1994. Although average prices received per cwt were up \$6.00 for sheep and \$15.00 for lambs, marketings were only 9 percent of the previous year. The major challenge the sheep industry faces is the lack of a stable local market.

Poultry Review

BY

GAIL GREGORY

Broiler Production and Value: Alabama broiler producers marketed 900.0 million birds during the 1995 marketing year, a decrease of 1 percent from 1994. Cullman was the leading broiler county, followed by DeKalb, Marshall, Blount, and Coffee. Cash receipts amounted to \$1.44 billion, down fractionally from the previous year. Alabama ranked third in broiler production behind Arkansas and Georgia.

Layer and Eggs: During 1995, Alabama's laying flocks produced 2,693 million eggs, down 1 percent from the previous year. There were 11.3 million layers 20 weeks old and older on hand December 1, 1995 compared with 11.6 million in 1994. Cullman County had the largest inventory, followed by Marshall, DeKalb, Blount, and Randolph counties. Cash receipts from eggs were \$215.7 million, up 5 percent from 1994. Alabama ranked 11th nationally in egg production.

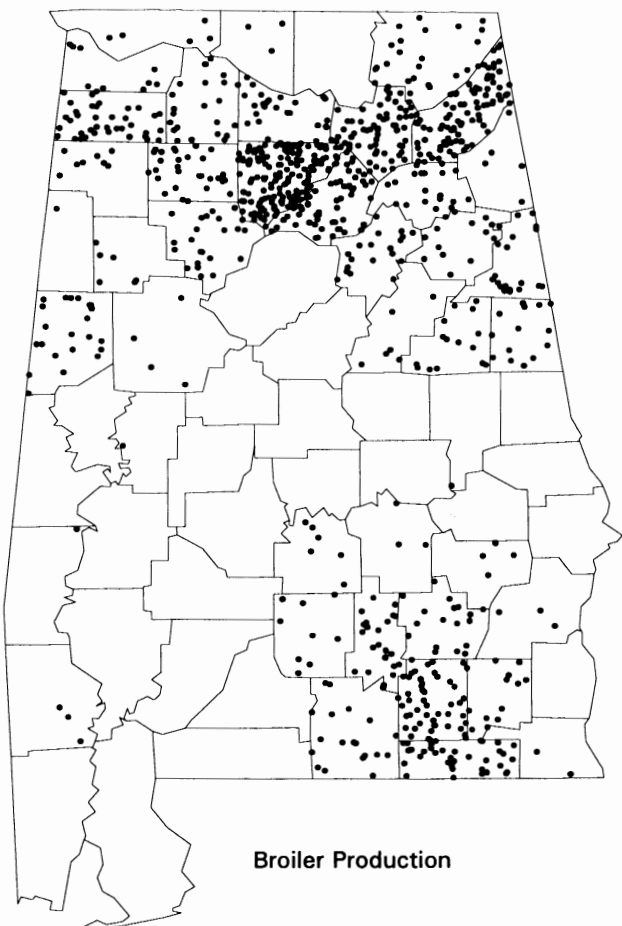

Broiler Hatchery Production: Commercial broiler hatcheries in Alabama hatched 1.08 billion chicks in 1995, up 2 percent from the previous year. Alabama hatcheries shipped 141.1 million broiler-type chicks to other states, including 47.0 million to Mississippi and 42.1 million to Georgia. Chicks shipped into Alabama numbered 20.4 million. Egg-type hatchery data are not published to avoid disclosing individual operations.

1/ Estimates are for market eggs only.

Prices Received by Farmers: Represent marketing year average prices received at the point of first sale for all grades and qualities of the commodity sold. Points of first sale range from bulk sales at the farm to packed and graded products delivered to a local market. For crops, the price refers to all sales during the year, regardless of the year harvested. The average price would result from dividing the total dollars received by all farmers, before any marketing charges are deducted, by the total quantity sold.

Prices Paid by Farmers: The number of production items used on farms is so extensive that it is not feasible to collect price data for all inputs. Therefore, about 180 selected items are priced to represent groups of similar items in the major production expenditure categories. Prices paid by Alabama farmers are represented in the Agency's prices paid surveys, but no individual State estimates are published. Average prices for the surveyed production input items are a component of the Index of Prices Paid by Farmers. This index, calculated on the 1910-14 base, is called the Parity Index and is required by law.

Cash Receipts Review

BY

PAUL WILLIAMS

Farm Cash Receipts: Cash receipts from farm marketings dropped slightly from \$2,951 million in 1994 to \$2,908 million for 1995. Livestock and poultry products, valued at \$2,168 million, accounted for 75 percent of the total. Crop receipts (including nursery and greenhouse products), at \$741 million, made up the remaining 25 percent. Non-farm commercial timber receipts climbed to \$658 million. Total farm and forestry receipts (including government payments and other farm income) totaled \$4,104 million against \$4,058 million in 1994.

Alabama poultry and poultry products accounted for almost 60 percent of the state's total cash receipts. Cattle and calves ranked second. Cotton was third followed by greenhouse, sod and nursery products and peanuts. Sales from these 5 enterprises were each more than \$100 million. Together, they made up almost 85 percent of the total cash receipts from farm marketings.

Receipts from the state's broiler sales totaled \$1,438 million, down slightly from the 1994 total of \$1,444 million. Cattle and calf returns totaled \$308 million, up \$8 million from 1994. Receipts from most crops produced in the state were down from the previous year with the exception of corn, sweet potatoes, pecans and peaches.

Cash Receipts Tables: Cash receipts for counties with limited production are included in district totals.

Definitions: The definitions below will be helpful in interpreting the information on the following pages.

Cash Receipts: Estimates of the value of all agricultural commodities marketed or removed from the farm where produced during the calendar year. Sales were from open-market channels, placement of commodities under CCC loan, any gain (excess of market value over CCC contract value) on commodities reclaimed from CCC and any other removals. Cash receipts include sales of commodities regardless of the year produced. Cash receipts exclude non-monetary transactions such as on-farm use of agricultural commodities.

Government Payments: Includes cash payments for feed grains, wheat, and cotton, amounts paid under agricultural and conservation programs, and miscellaneous payments under programs such as Rural Clean Water and Disaster. The Farm Service Agency (FSA) supplied the information.

Farm Forest Products: Stumpage revenue from sales of forest products from farms. These receipts are considered Other Farm Income. These data and non-farm timber sales by county were provided by the Alabama Forestry Commission.

Non-farm Commercial Timber: Stumpage revenue from sales of forest products taken from other private, forest industry and government owned lands.

Other Farm Income: Includes machine hire and custom work, forest product sales, custom feeding fees, and other farm business-related income. In the county tables these receipts are not published separately for each county, but are included in district totals.

Value of Production: Crop value is derived by multiplying production by the estimated season average price received by farmers. Value of production for livestock and poultry reflects value of the number of head on the inventory date. It is derived by multiplying the number of head by an estimated value per head as of that date.

Cash Receipts by Commodities, 1970-1995

Commodity	1970	1975	1980	1985	1990	1994	1995

A = Acreage; P = Production.

1/ Production, Disposition and Income.

2/ Issued weekly.

Reports Issued by the Alabama Agricultural Statistics Service

<p>Alabama Farm Facts</p> <p><i>A report containing statistics for a variety of commodities produced in Alabama and the Nation. Size of inventory, acreages, yields, production, and prices comprise the majority of the statistics.</i></p>	<p style="text-align: center;">Monthly (Around the 15th)</p>
<p>Weekly Weather Crop Report</p> <p><i>Crop condition and progress are reported during the growing season. Soil moisture supplies and other weather related information are included in the report.</i></p>	<p style="text-align: center;">About 40 Weeks per Year</p>
<p>Broilers</p> <p><i>Broiler eggs set and chicks placed are reported for Alabama and 15 major producing states.</i></p>	<p style="text-align: center;">Weekly (Each Wednesday)</p>
<p>Alabama County Data</p> <p><i>Estimates for cattle, hogs, poultry, milk, corn, cotton, hay, wheat, peanuts, and soybeans are available at the county level.</i></p>	<p style="text-align: center;">Annually (Between March and August)</p>
<p>Alabama Agricultural Statistics</p> <p><i>A composite publication showing current and revised data for most reports issued during the year, including county data for major commodities.</i></p>	<p style="text-align: center;">Annually (Usually in September)</p>

Access to Electronic Information

Alabama Crop and Livestock Reports

World Wide Web

Alabama Agricultural Statistics (our annual bulletin) and the *Alabama Farm Facts* (issued monthly) are available on the Internet. For access, connect to the Internet and enter: <http://www.acenet.auburn.edu/department/nass/>

Electronic Subscriptions

The following Alabama Agricultural Statistics Service reports are available through an automated mailing list. To subscribe, send an e-mail to:

majordomo@acenet.auburn.edu

In the body of the message type the words: **subscribe alagstat**

Crop Weather (weekly)

Broilers (weekly)

News Releases (periodically)

Alabama Farm Facts (monthly)

Alabama County Data (annually)

National Reports

All National Agricultural Statistics Service (NASS) reports, selected Economic Research Service (ERS) reports, and over 260MB of historic data are available on the Internet. For access, connect to the Internet and choose one of the following:

World Wide Web:

<http://www.usda.gov/nass/>

Gopher/Telenet/FTP:

HOST = usda.mannlib.cornell.edu

Telenet: User ID = **usda** (lower case only)

FTP: User ID = **anonymous**

Password = <your e-mail address (optional) >

Then change your directory to **usda**

Electronic Subscriptions

NASS reports are also available through an automated mailing list. When you subscribe, the reports of interest will be sent directly to your e-mail address within 3 hours of release, at no charge.

For more information, send an e-mail to: usda-reports@usda.mannlib.cornell.edu

In the body of the message type the word: **list**

Alabama Agriculture

A Graphic Overview

ALABAMA'S RANK IN U.S. AGRICULTURE

- # 2 - Catfish Annual Sales
- # 3 - Broiler Production
- # 3 - Peanut Production
- # 5 - Sweetpotato Production
- # 6 - Pecan Production
- # 10 - Small Farms (Sales < \$10,000)
- # 10 - All Chickens
- # 11 - Layers 20 Weeks and Older
- # 11 - Egg Production
- # 11 - Cotton Production
- # 11 - Peach Production (utilized)
- # 11 - Fresh Tomatoes
- # 12 - Watermelons
- # 14 - Beef Cow Inventory

BROILERS PRODUCED

1940 - 1995

EGG PRODUCTION

1925 - 1995

ALL CATTLE

1867 - 1996

CATFISH

Cash Receipts, 1987 - 1995

COTTON

Acres Planted, 1946-1995

CORN

Acres Planted, 1946-1995

SOYBEANS

Acres Planted, 1946-1995

PEANUTS

Acres Planted, 1946-1995

CROP RECEIPTS, 1995

Total: \$740.8 Million

TOTAL FARM AND FORESTRY RECEIPTS
