# ALABAMA AGRICULTURAL STATISTICS

OCT 08 1997

1995

1996

BULLETIN

Yes, Alabama farmers are truly "*Experts in the Field*." The logo adopted by the Department of Agriculture and Industries assures consumers that the Alabama farm products they purchase are of the utmost quality. The State's farmers assume large financial risks with no guarantee of a profitable return for their labors. They deserve much recognition in their quest to provide the Nation and World with food and fiber at very economical prices. So, look for the Alabama logo and **SUPPORT ALABAMA AGRICULTURE!**

## America Counts on Agriculture

### 1997 CENSUS OF AGRICULTURE

#### *Alabama Farmers!*

*When you receive your Census Form later this year,  
please return it by February 2, 1998. Thank you.*

*Special thanks to Alabama Farmers Federation (ALFA) for providing the front cover. Alabama Agricultural Statistics is one of the most colorful and attractive annual bulletins of all State Statistical Offices.*

DEPARTMENT OF AGRICULTURE

AND INDUSTRIES

Jack Thompson, Commissioner

The National Association of State Departments of Agriculture (NASDA) is a nonprofit, nonpolitical organization comprised of the 50 State Departments of Agriculture. NASDA and USDA-NASS have a cooperative agreement for NASDA to employ enumerators in the collection of agricultural statistics. Following is a list of Alabama's NASDA enumerators (as of January 1, 1997). Without their help, the presentation of statistics in this bulletin would not be possible. The Alabama Agricultural Statistics Service gratefully acknowledges the work and integrity of its NASDA enumerators.

## **FIELD ENUMERATORS** (and home county)

Myriam Allen - Baldwin  
Gerald Bentley - Lawrence  
Huston Bolton - Colbert  
Sarah Castile - Lauderdale  
Jerry B. Clark - Greene  
Billy C. Davis - Lowndes  
John Erzen Jr. - Clarke

Basic information on Alabama agriculture helps our farmers, consumers, and businesses alike. How much we produce and from what area our farm products come from is vital to an orderly food production and marketing system. The numbers are also useful to those outside Alabama that may be looking for supplies of the commodities we consistently produce, thereby promoting economic activity for our producers and our overall economy. This edition of *Alabama Agricultural Statistics* provides a summary of Alabama agriculture in the form of numbers and graphics. I hope you find it an easy reference for your information needs.

The livestock industry is going through many changes all over the country. Concentration and integration of the poultry industry came about rapidly and is becoming more common in swine production. Our cover spotlights Alabama's hog industry and like many other states, the expansion of contract production. I anticipate many opportunities as well as challenges these changes will likely bring to Alabama. I especially want to salute all Alabama pork producers for the significant contribution they make to our state's economy.

For the many Alabama farmers and agribusinesses that provided the basic data used in compiling this bulletin, you can take pride in knowing your individual reports resulted in the most comprehensive and accurate accounting of Alabama's agricultural sector. My hat is off to you for understanding the importance of this effort. Thank you very much. Your Department of Agriculture and Industries, working cooperatively with USDA/NASS, is proud to present this year's statistical bulletin.

*Jack Thompson*  
Jack Thompson  
Commissioner

Agriculture is very important to Alabama's economy. Here are a few facts to put this growing industry into perspective. Alabama's farm cash receipts totaled a record \$3.18 billion in 1996, an increase of 11 percent from 1995 receipts. When you add in forestry receipts, government payments, and other farm related income the total reaches \$4.24 billion in 1996 farm and forestry receipts. The additional economic activity generated by agriculture throughout the food and fiber system in the form of value added products, processing, transportation, distribution, and jobs is monumental. Added up, Alabama Agriculture generates over \$10 billion towards the state's economy each year.

Through a cooperative agreement with Alabama's Department of Agriculture and Industries, we proudly present the basic statistics on Alabama agriculture for 1996 and earlier years in this edition of *Alabama Agricultural Statistics*. We have added some additional features in this year's bulletin including catfish water surface acres, bee and honey statistics, and demographic information on Alabama. Look for the bulletin and other agricultural statistics for Alabama and the U.S. at our web site location: <http://www.acenet.auburn.edu/department/nass/>

This publication is possible only with the help of the many farmers in Alabama who voluntarily report to us on our surveys. Their reports are the basis for the numbers and graphics found on each page. We applaud their dedication and appreciate the time they take to complete the surveys. We also thank the agribusinesses, commodity groups, and other organizations who helped to make this bulletin possible. Please contact our office in Montgomery if we can provide statistics on Alabama or U.S. agriculture.

Herb L. Vanderberry  
State Statistician

## State Highlights for 1996-97:

- ✗ Total farm and forestry receipts were over \$4.2 billion for the year.
- ✗ Cash receipts from farm commodities totaled \$3.18 billion in 1996 against \$2.87 billion the previous year.
- ✗ The top five commodities for cash receipts were: (1) poultry, (2) cattle and calves, (3) cotton, (4) nursery, sod, and greenhouse products, and (5) peanuts. Together they made up about 85 percent of the total receipts. Sales from these enterprises were each over \$100 million.
- ✗ Livestock and Poultry accounted for three-fourths of the cash receipts and Crops the remaining fourth.
- ✗ Poultry made up almost 60 percent of the total cash receipts.
- ✗ Alabama ranked third in broiler production with marketings of 873 million birds.
- ✗ Laying flocks produced 2.48 billion eggs to rank Alabama 11th in egg production.
- ✗ Cattle inventory on January 1, 1997 was 1.6 million head. The state's ranking was 22nd.
- ✗ Catfish sales amounted to \$52.8 million. Alabama ranked second behind Mississippi in sales.
- ✗ Principal crops and acreages were: cotton (520,000), corn (310,000), soybeans (330,000), peanuts (192,000), and wheat (110,000).
- ✗ The state ranked third in peanuts and 9th in cotton production.
- ✗ Alabama ranked second in commercial forest land, with 21.9 million acres.

## Crops Review 1996

BY

MARK E. HUDSON

The 1996 crop year ended on a high note for most Alabama row crop farmers. Favorable weather conditions throughout the growing season and strong market prices for most crops provided some relief from the previous year when crops suffered from drought, two hurricanes, and extensive insect damage. The state's average cotton yield was up over 300 pounds from 1995, due in part to reduced insect pressure in northern and central counties. Soybean farmers realized record setting yields at an average of 34 bushels, three bushels over the previous record. Conditions in the Wiregrass region were more variable, compared with other parts of the state. Crop yields fluctuated depending on rainfall patterns over the area. Peanut yields were reduced on some farms, but overall, the state average broke 2,300 pounds. On the downside, peach growers in Chilton and most other counties suffered tremendous losses. A severe cold snap in March virtually wiped out the entire peach crop. Production at only 500,000 pounds set a new record low.

Land preparation and spring planting for the 1996 crop year got off to a good start over most of the state. Wet weather in early April slowed seedbed preparation in some areas, but clear skies during late April and May enabled farmers to get their crops in the ground slightly ahead of schedule. Spring potatoes, grown mostly in Baldwin County, suffered two killing frosts and some producers were forced to replant most all of their fields. Alabama's cotton, corn, soybean, and peanut crops generally emerged to full stands and very little acreage had to be replanted. Harvest of the state's wheat crop got underway about mid-May. Although frequent rains slowed harvest in some localities, most farmers got their crop harvested on schedule.

On June 1, conditions were favorable for most crops. In the Wiregrass Region in southeast Alabama, however, a few weeks of dry weather slowed crop growth and development, especially for peanuts. But, much needed rains blanketed the state during early June which gave peanuts and other row crops just the boost they needed. Conditions remained almost ideal during July, August, and September. Rains came at just the right time to provide adequate to surplus moisture throughout the growing season and temperatures were generally cooler than in previous years. Producers kept a watchful eye on insects and diseases, but the cooler temperatures and routine pest management practices greatly reduced insect and disease pressure on most crops. Prospects for the state's pecan crop were favorable while sweet corn, tomatoes, watermelons, and other vegetables moved to market in abundant supply.

The frequent rains that had been so beneficial to crops during the growing season continued during September and October as row crop harvest began. Despite rain delays, farmers made excellent progress harvesting their crops and finished the process mostly on schedule. A few low-lying fields of cotton in the Tennessee Valley were harvested after Christmas and potato harvest in DeKalb and Jackson Counties was delayed for a week or so. Land preparation for fall planted wheat, oats, and winter grazing crops went well. Seeding of these crops fell behind schedule in some areas where rain was excessive, but the moisture was beneficial in getting the crops off to a good start. A sizable pecan crop was harvested, but quality was reduced by excessive rains, especially in Baldwin and Mobile Counties. All-in-all, 1996 was a good crop year in Alabama.

### Normal Crop Progress

| Crop                   | Planting Begins | Planting Ends | Harvest Begins  | Harvest Ends   |
|------------------------|-----------------|---------------|-----------------|----------------|
| Corn                   | Mid-March       | Mid-June      | Late July       | Early Nov      |
| Cotton                 | Early April     | Mid-June      | Mid-September   | Mid-December   |
| Hay, first Cutting     | ---             | ---           | Early May       | Mid-July       |

## Livestock Review 1996

BY

RICK GEESEY

**Cattle and Calves:** Cash receipts from farm marketings dropped 7 percent from 1995 to \$286.1 million. A 16 percent increase in the number of cattle and calves marketed was not enough to offset weak prices. Prices received by Alabama producers during 1996 plummeted to \$41.30 per hundredweight for cattle and \$49.20 for calves. Cattle prices were \$10.10 per cwt below 1995 and calf prices were down \$10.50. On January 1, 1997, 1.60 million head of cattle and calves were on farms in Alabama, a decline of 9 percent from a year earlier. Beef cow inventory was down 8 percent to 829,000 head and beef cow replacement heifers, at 138,000 head, were down 11 percent from the previous year. There were 31,000 milk cows in Alabama dairy herds, down 1,000 head from January 1, 1996.

**Hogs and Pigs:** All hogs and pigs on hand December 1, 1996 numbered 200,000 head, a decrease of 13 percent from 1995. The number of breeding hogs, at 25,000, was down 7 percent and total market hogs, at 175,000, were down 12 percent. Forty three thousand sows farrowed 316, 000 pigs in 1996. The average number of pigs per litter was 7.9, compared with 7.75 in 1995. Cash receipts from hogs and pigs were \$71.9 million and the average price received per cwt was \$47.50.

**Milk Production:** The dairy industry in Alabama continued the trend toward fewer milk cow operations. The number of operations with milk cows during 1996 was estimated at 300. There were 223 commercial dairies as of January 1, 1997 according to the State Department of Agriculture and Industries. Milk produced in the State totaled 434 million pounds in 1996, 10 percent less than the previous year. However, as efficiencies continue to be gained, milk per cow decreased 613 pounds to average 13,563 pounds. Prices received for milk increased \$2.40 per cwt from \$14.00 in 1995 to \$16.40 per cwt in 1996. Alabama cash receipts from milk were up 5 percent in 1996 to 70.5 million.

**Catfish:** Sales of catfish in Alabama increased 4 percent to \$52.8 million during 1996 from \$50.9 million during 1995. The average price received for foodsize catfish was 71 cents per pound, compared with 72 cents the year before. There were 245 operations in the State producing catfish on January 1, 1997. The catfish industry continued to show a moderate rate of expansion throughout the year.

**Sheep and Lambs:** On January 1, 1997, there were 9,000 sheep and lambs on Alabama farms, up 2,000 head from the previous year. Ewes at 4,900 head, increased by 32 percent while rams, at 500 head were unchanged. Replacement lamb numbers climbed to 1,600 head, a 23 percent increase. The 1996 cash receipts for sheep and lambs totaled \$120,000. Higher prices received for sheep and lambs and more marketings drove receipts up sharply from the previous year. The lack of a stable local market continues to plague many Alabama sheep producers.

### Did You Know .....

- There was a record high ~~28.5~~<sup>2.85</sup> million cattle and calves on Alabama farms in 1976 (we now have only 1.6 million). Calves were bringing \$29.20 per cwt, only \$20 below 1996 prices.
- The hog inventory in Alabama has steadily declined from a record number of 1.64 million head in 1897. Hogs were worth \$2.50 per head back then, compared with about \$90 per head 100 years later.
- The highest annual milk production for Alabama was 1.36 billion pounds. This record was set in 1944 by 416,000 milk cows (almost 14 times the number of milk cows in dairy herds today).
- Sales of Alabama farm-raised catfish have almost quadrupled since 1987. That year, producers had \$14.2 million in sales compared with \$52.8 million in 1996.
- Back in 1956, there were 110,000 sheep and lambs on Alabama farms. This number has dwindled to 9,000 head currently on farms.

### Catfish Water Surface Acres, 1997

## Poultry Review 1996

BY

**GAIL GREGORY**

**Broiler Production and Value:** Alabama broiler producers marketed 873.3 million birds during the 1996 marketing year, a decrease of 3 percent from 1995. Cullman was the leading broiler county, followed by DeKalb, Marshall, Blount, and Coffee. Cash receipts amounted to \$1.63 billion, up 14 percent from the previous year. Alabama ranked third in broiler production behind Arkansas and Georgia.

**Layer and Eggs:** During 1996, Alabama's laying flocks produced 2.48 billion eggs, down 8 percent from the previous year. There were 10.6 million layers 20 weeks old and older on hand December 1, 1996 compared with 11.3 million in 1995. Cullman County had the largest inventory, followed by Marshall, DeKalb, Blount, and Randolph counties. Cash receipts from eggs were \$225.4 million, a 4 percent increase from 1995. Alabama ranked 11th nationally in egg production.

**Broiler Hatchery Production:** Commercial broiler hatcheries in Alabama hatched 1.05 billion chicks in 1996, down 3 percent from the previous year. Alabama hatcheries shipped 130.9 million broiler-type chicks to other states, including 47.5 million to Mississippi and 52.3 million to Georgia. Chicks shipped into Alabama numbered 16.7 million. Egg-type hatchery data are not published to avoid disclosing individual operations.

1/ Marketing year average prices are weighted prices for crops, livestock, and poultry items sold during the marketing year.

They represent average prices received by farmers at the point of first sale for all grades and qualities of the commodity sold.

2/ Estimates are for market eggs only.

#### Alabama Cattle and Cotton Prices

#### Prices Received, 1987-1996

Prices for cattle and cotton in Alabama showed contrasting patterns the past 10 years. Cattle prices tended to follow the normal cycle. They began at \$53.30 per cwt. and peaked at \$76.60 about mid-way in the period when inventory numbers bottomed out. Then prices fell to \$41.30 as the period ended.

During the same time, cotton prices showed less fluctuation. Growers received a low of 52.9 cents per pound in 1988 and a high of 72.9 cents in 1995.

## Cash Receipts Review 1996

BY

PAUL WILLIAMS

**Farm Cash Receipts:** Farm receipts for 1996 hit a record high in Alabama totaling \$3.69 billion, 9 percent above 1995 farm receipts. This includes receipts for crops, livestock & poultry, government payments, farm forest products, and other farm related income such as custom work. Total farm and forestry receipts, including non-farm commercial timber, reached \$4.24 billion, also a record for the State.

Broiler receipts, the largest individual commodity in Alabama's total receipts, reached a record \$1.63 billion, up 14 percent from the previous year. Cattle receipts were off 7 percent totaling \$286 million as cattle prices were depressed for calves, stockers, and cows. Egg receipts totaled \$225 million in 1996, up 4 percent and also a record level for Alabama. Hog, dairy, and catfish receipts rose in 1996, with catfish sales totaling a record \$52.8 million. Total livestock and poultry receipts, at \$2.36 billion, were 9 percent above 1995 receipts.

Alabama cotton receipts in 1996 totaled \$265 million, a 58 percent jump from the drought and insect plagued 1995 crop. Greenhouse, nursery, and sod sales totaled \$190 million, up 6 percent from the previous year. Peanut returns were down 15 percent to \$119 million due to a variable production year and lower prices. Soybean and corn receipts were up 51 percent and 37 percent, respectively. Total crop receipts were \$815 million, up 16 percent from 1995.

**Cash Receipts by County:** For counties with limited production of a specific commodity, cash receipts for that commodity are not published, but are included in the county's Total Farm Receipts.

**Definitions:** The definitions below will be helpful in interpreting the information on the following pages.

**Cash Receipts:** Sales of agricultural commodities at the first point of sale by establishments (farms) from which \$1,000 or more of agricultural products were or would normally be sold during the year. Cash receipts include sales of commodities regardless of year produced. They exclude non-monetary transactions such as on-farm use of agricultural commodities.

**Government Payments:** Includes cash payments for feed grains, wheat, and cotton, amounts paid under agricultural and conservation programs, and miscellaneous payments under programs such as Rural Clean Water and Disaster. The Farm Service Agency (FSA) supplied the information.

**Farm Forest Products:** Stumpage revenue from sales of forest products from farms. These data and non-farm timber sales by county were provided by the Alabama Forestry Commission.

**Non-farm Commercial Timber:** Stumpage revenue from sales of forest products taken from other private, (non-farm) forest industry and government owned lands.

**Other Farm Income:** Includes machine hire and custom work, custom feeding fees, and other farm business-related income. In the county tables, these receipts are not published separately but are included in each county's Total Farm Receipts.

**Value of Production:** Crop value is derived by multiplying production by the season average price received by farmers. Value of production for livestock and poultry reflects inventory value. It is derived by multiplying the number of head by the average value per head. Value of production is shown in other sections of the bulletin.

### Cash Receipts by Commodities, 1970-1996

| Commodity                         | 1970  | 1975    | 1980    | 1985    | 1990    | 1995    | 1996    |
