---------------------------------	-------

The Alabama Department of Agriculture and Industries and USDA's National Agricultural Statistics Service are proud to present the 48th edition of *Alabama Agricultural Statistics*. The numbers contained in this publication are a testimony to the importance of agriculture in this state. Agriculture is the No. 1 industry in Alabama. Farm and forestry receipts for 2005 totaled over \$5 billion, with over \$40 billion impacting our state's economy. The agriculture industry employs over 467,000 people, constituting 21% of the state's workforce.

Alabama farmers produce many specialty crops such as pecans, strawberries, blueberries, and pumpkins. Not only do these fruits and nuts taste great, they are incredibly good sources of nutrition. I hope you will support your local farmers by buying their fresh from the farm specialty crops. It is good for our farmers and good for your health!

Some of the best agricultural products in the world are grown or produced right here in Alabama. I am committed to helping our farmers and producers maintain their success in the coming year. In this issue of *Alabama Agricultural Statistics*, we pay tribute to Alabama's specialty crops.

Ron Sparks
Commissioner

Alabama agriculture has diversity in products that may surprise those that are unfamiliar with the State. This year's edition of *Alabama Agricultural Statistics* highlights our specialty crop industry. Statistics on these items can be found on pages 26, 27, and 95.

We thank the many producers of our agricultural products in Alabama for providing the basic information on our surveys to produce this bulletin. Farmers and agribusinesses across the State are the best source for the facts about our State's number one industry.

Our enumerator corps who spend hours collecting the survey data from farmers are invaluable and deserve special recognition for their part in this bulletin. Finally, the staff of the Alabama Field Office, USDA/NASS has done another excellent job in putting this publication together. My sincere thanks is extended to each of them for their roles in providing the numbers contained inside.

Remember, *Alabama Agriculture Counts!*

Herb Vanderberry
Director

Hurricanes Dennis and Katrina, which hit Alabama's Gulf Coast, caused crop yields to be somewhat lower for some farmers. Most fields across the state recovered from weather damage better than expected. Katrina took its toll on the more mature **cotton** fields in Baldwin and Mobile counties, as well as several other counties. Later planted fields fared very well. Yield was 749 pounds of lint per acre, compared to 724 pounds per acre the previous year and the ten year average of 605 pounds per acre. Some **corn** fields were blown over but harvested with minimal loss. Alabama corn yield was 119 bushels per acre, 4 bushels below the record set in 2004. The ten year average is 91 bushels per acre. Production came in at 23.8 million bushels, 1 percent less than in 2004. **Peanut** yields varied across the state because of the hurricanes, salt water, tomato spotted wilt virus and dry conditions during harvest. As peanut acreage increases in south western Alabama, peanut production continues to show an increase. Production totaled 613.3 million pounds and yield was 2,750 pounds per acre, down 50 pounds per acre from 2004 and 210 pounds below the record 2,960 set in 1984. **Soybean** fields were affected by hurricane debris in the fields. Growers planted less acreage because of Asian Soybean Rust concerns and low prices. Growers believed dry conditions during September caused yields to be lower, especially during pod fill. Hurricanes brought much needed rain to younger soybeans. Soybean production totaled 4.8 million bushels compared to 6.7 million bushels the previous year. The yield of 33 bushels per acre was two bushels below 2004. The ten year average is 27 bushels per acre. **Hay** fields were reported as mostly good to excellent during the 2005 year. The yield was 2.7 tons per acre, unchanged from the record yield set in 2004. **Irish potato** growers experienced excessive moisture that caused rot and unharvested potato acreage again this year. Producers planted 1,600 acres, down 700 acres from last year, and 1,300 acres were harvested. Yield was 155 cwt. per acre, 20 cwt. per acre below the 2004 yield. Twenty-seven hundred acres of **sweet potatoes** were planted, down 100 acres from previous year. Harvested area was 2,500 acres, compared to 2,300 acres last year. Many fields were left unharvested due to wet weather. The average yield at 150 cwt. per acre, was 15 cwt. per acre less than last year. **Wheat** seedings for 2006 were slightly behind schedule because of dry conditions. An estimated 100,000 acres have been sown.

*These 15 commodities accounted for nearly 88% of Total Farm & Forestry Receipts.

For counties with limited production of a specific commodity, cash receipts (starting on page 46) for that commodity are not published, but are included in the county's Total Farm Receipts. USDA's Farm Service Agency (FSA) supplied information on government payments and stumpage revenue for farm forest products and non-farm commercial timber was provided by the Alabama Forestry Commission. Other farm income includes money received for machine hire and custom work, custom feeding fees, and other farm business-related income. These receipts are not published separately but are included in each county's Total Farm Receipts.

The 2002 Census of Agriculture was taken to obtain Agricultural Statistics for Alabama and each county in the state, as well as every county and state in the Nation. The 2002 Census introduced new methodology to account for all farms. All Census items published for 2002 were adjusted for undercoverage. To provide comparable data, 1997 Census data were also adjusted.

The Census data provided in this bulletin (pp 94-96) represent only a small portion of the total information collected and published in the 2002 Census of Agriculture. Log onto our website (<http://www.usda.gov/nass/>) and click on "Agriculture Census" to see all the census numbers for the U.S. and each state, including Alabama.

The *Help Alabama Grow A+* program and the *Farm to School* program spotlight Alabama's farmers and the goods they produce. *Help Alabama Grow A+* is designed to showcase Alabama's specialty crops-fruits, vegetables, greenhouse goods, Christmas trees, sods, nuts, and Satsumas, a tasty mandarin orange produced in the southern sections of Alabama. The *Farm to School* program takes fruits and vegetables grown in Alabama, such as sweet potatoes, watermelons, Satsumas, cantaloupes, and apples, and puts them on the lunch plates of Alabama school children. Some of the best agriculture in the world is grown right here in Alabama and these programs help to promote our farmers.
